

Requirements

You must meet the following requirements before you can install McAfee Total Protection for Endpoint software.

- **Operating System:** Microsoft Windows XP, Windows Vista, or Windows 7.
NOTE: For Windows XP, you must run the install application while logged into a user account with administrative rights. Either right-click on the installer application and select "Run As ..." and choose administrator, or log out of your computer and log back in as the administrator.
- If you are currently using Georgia State's Symantec Anti-Virus software or another anti-virus solution listed in [Appendix A](#), McAfee will uninstall that software during installation. If you have an antivirus solution not listed in [Appendix A](#), you must uninstall the software before proceeding with the steps to install McAfee Total Protection for Endpoint.

Steps to Install McAfee

1. If you installed an anti-virus other than Georgia State's Symantec Anti-Virus software or another anti-virus software not listed in [Appendix A](#), you must uninstall that software before proceeding.
2. Go to https://downloads.gsu.edu/mcafee/mcafee_for_personal_computers.exe and download the Windows version of McAfee for students.
NOTE: You must use your CampusID and password to access the file.
3. Click "Save" when windows prompts you.
NOTE: If you are using Windows XP, proceed to step 4, and if you are using Windows Vista or Windows 7, proceed to step 5.
4. Click "Save" in the Save As dialog box, and click "Open Folder" in the Download complete dialog box.
5. Locate the downloaded file and double-click the file, "mcafee_for_personal_computers_v1.exe," to begin the installation.
 mcafee_for_personal_computers
NOTE: The file will have _v and a version number (e.g., mcafee_for_personal_computers_v1.exe) This number will vary, depending on the latest version.
6. Read and follow the instructions in the McAfee Antivirus Installation dialogue box and click "Accept."
NOTE: If you are currently running Windows XP and uninstalled your old anti-virus software

manually or do not have any anti-virus software installed on your computer, proceed to step 8.

7. In the *VirusScan Setup* dialog box, click “Yes” to remove your old anti-virus software and Windows Defender, if it is installed on your computer.
NOTE: The uninstall process will take some time. Please be patient.
NOTE: After the previous anti-virus is removed, Windows will alert you that you have no anti-virus software. You may safely ignore this alert for the moment.
8. Click “Next” in the *McAfee VirusScan Enterprise Setup* dialog box.
9. Select “Perpetual” in the drop-down menu and accept the license agreement in the *McAfee Licensing* dialog box (see figure 1).

Figure 1: McAfee End User License Agreement

10. Click the “OK” button after selecting the “Perpetual” license expiry type and accepting the terms of the license agreement.
11. Select “Typical” in the *Select Setup Type* dialog box and click “Next.”
12. Select “Standard Protection” in the *Select Access Protection Level* dialog box and click “Next.”
13. Click “Install” in the *Ready to install* dialog box.
NOTE: The install process takes some time. Please be patient.
14. Make sure “Update Now” and “Run On-Demand Scan” are selected and click “Finish.”
NOTE: The “Update Now” and “Run On-Demand Scan” may take a couple of hours or more to

complete. You may continue working on other things while these steps run, or you may uncheck “Run On-Demand Scan” and perform a scan when you have time.

15. Click “OK” in the McAfee VirusScan Enterprise Setup dialog box.

Note: This dialog box will pop up after the updates and/or on-demand scan are complete. Depending on your machine, it may take several hours or more before this dialog appears.

16. Click “Yes” in the VirusScan Setup dialog box to reboot your computer and complete the installation.

NOTE: After your computer has restarted, a Windows security dialog may warn you that some of your security features are out of date. Even though McAfee already updated, you should manually update anything else indicated by Windows.

After Installation

After installation, the McAfee icon will appear in the system tray, located in the lower right-hand corner of your desktop.

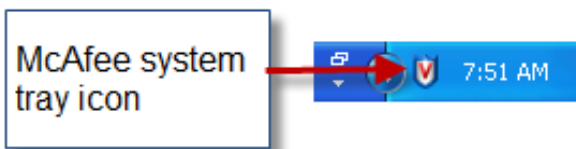

Figure 2: McAfee system tray icon

Steps to Perform a System Scan

1. Right-click the McAfee system tray icon (see Figure 2).
2. Click “On-Demand Scan” (see figure 3).

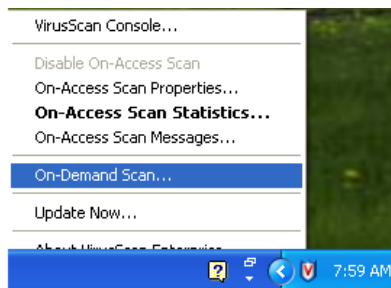

Figure 3: Start a McAfee Virus Scan

3. In the On-Demand Scan Properties dialog box that appears, click “Start.”

NOTE: A scan can take up to an hour or more, depending on the setup of your individual computer.

Steps to Create a Scheduled Scan

1. Right-click the McAfee system tray icon (see Figure 2).
2. Select "VirusScan Console."
3. Double-click "Full Scan."
4. Click "Schedule."
5. Click "Enable" under the Tasks tab in the *Schedule Settings* dialog box.
6. Click the "Schedule" tab and choose when to run the scheduled scan.
7. Click "Apply" followed by "OK" after you've made your selection.
8. Click "OK" in the *On-Demand Scan Properties* dialog box.

Help

If you have questions or need assistance, the McAfee Service Portal (<http://mysupport.mcafee.com>) provides a comprehensive, searchable collection of support tools with centralized access to McAfee's library of technical information and product documentation. If you create an account, you will need to include our grant number. The **grant number is 4145594-NAI**. Also, McAfee can be reached 24 hours a day at 1-800-937-2237.

Appendix A

The following is a list of common anti-virus software that McAfee will automatically uninstall for you during the installation process.
