

Scholarly Support Program Pilot Program

University Research Services & Administration
Application due date: January 11, 2008

PURPOSE

The purpose of the Scholarly Grant Program is to support the scholarly and artistic activity of tenured or tenure-track faculty that will result in a significant and prestigious product (e.g., book, external funding, prestigious fellowship.)

One campus-wide competition is held each fiscal year, with the deadline to be announced by the Vice President for Research. Two to four awards are expected to be made during the piloting of this program. Principal Investigators are responsible for ensuring that activities conducted under the program are in compliance with all applicable University and Board of Regents policies and procedures.

AMOUNT AND TIME FRAME OF AWARD

Applicants may request support for a maximum period of twelve months (July 1 through June 30) and all grant funds must be expended during the fiscal year awarded. Scholarly Support Grants are limited to a maximum of **\$15,000**, regardless of the period of performance. Allowable expenses include costs for student assistants, course release(s) as per the applicant's college workload and course buyout policies, summer support, project-related travel, participant remuneration, and research-related supplies and equipment. Course releases during the academic year are at the discretion of the applicant's chair and dean. Because department teaching obligations and policies vary, applicants should discuss their options with their chair early in the application process.

GENERAL ELIGIBILITY

The Vice President for Research encourages all full-time, tenured and tenure-track faculty to submit research proposals in any academic discipline offered in the University. However, assistant professors in the first four years of their appointment and senior faculty members in the first two years of their appointment are encouraged to seek funding from other internal grant programs (e.g., Research Initiation, Mentored) that give them priority. Only those faculty members who have sought external funding during the last 5 years or are seeking funding during the current fiscal year are eligible to apply. To be eligible to apply, application for external funding during the current fiscal year must occur by March 1, 2007. Receipt of external funding is not a requirement.

Faculty members may apply to more than one University Research grant program during a given fiscal year. However, applicants will receive only one award from the Research Initiation, Research Team, Faculty Mentored, and Scholarly Support Grant Programs in a fiscal year. Faculty can only receive a Scholarly Support Grant once every ten years. In addition, faculty who are funded through the Research Program Enhancement Program (either administered by the department or University Research office) **and** have external funding for the following fiscal year may not apply to this program. Questions about eligibility should be directed to the Associate Vice President for Research (alederberg@gsu.edu .)

APPLICATION INSTRUCTIONS

Because proposals are evaluated by an interdisciplinary peer review panel, they should be written to be understood by faculty who are not experts in the applicant's field. Applicants should limit their use of jargon and acronyms whenever possible. *Applications should address the review and award criteria described at the end of this program announcement.*

The proposal must be prepared with a letter quality printer using 12 point Ariel or Times New Roman font with one (1) inch margins on all sides. Each copy of the proposal should be on standard 8 1/2 by 11 inch paper and abide by the page limits noted below. Adherence to font and margin requirements is necessary for several reasons. No applicant should have an advantage over other applicants by providing more content in his/her application by using smaller, denser type. Small type sizes may also make it difficult for reviewers to read the application.

All material submitted for review must be contained in a single package. The relevant signatures **MUST** appear on the most **current** proposal cover page and the application must follow the most current guidelines. These are available at the University Research Services & Administration website or <http://www.gsu.edu/research/index.html>

The original proposal and twenty-five (25) copies should be delivered to University Research Reception Suite on the second floor of Alumni Hall by 4:00 p.m. on the deadline announced for the Scholarly Support Program. Late proposals are not accepted under any circumstances.

A Scholarly Support Program application consists of eleven (11) parts. Proposals that do not adhere to these instructions may not be reviewed.

1. **Cover Page:** (fillable pdf file available at end of this program announcement) Requires signatures of the applicant, Department Chair, and College Dean. Use the most current version of this cover page. Only one copy of the proposal needs original signatures.

Compliance: Proposals that use human subjects, non-human animal subjects, biohazardous agents, recombinant DNA molecules, Ionizing Radiation, and/or Biologically-Derived Toxins must obtain the appropriate approval(s) before funding can be awarded. If approval is pending at the time of application, approval must be obtained by July 1. Failure to obtain appropriate approval is grounds for withdrawing support for a proposal.

2. **Abstract** (one-half page limit): This summary should include a statement of the objectives, methods to be employed, and the significance of the proposed research/creative work.

3. **Project Description** (no more than four single-spaced pages): This section addresses the questions: What do you intend to do? Why is the work important? What has already been done? How are you going to do the work? Thus, the project description should include: Objectives for the proposed work and expected significance, relation to past work in the area, project design and methodology, and expected product. Applicants in the arts can support their application by providing a link to a website that allows access to their creative works. A reference list should be included (if appropriate) but is not subject to the page limitations.

4. **Potential for Extramural Support:** Describe potential for extramural support of the work. Include the kinds of award sought, sponsoring agency, specific program announcement, and

approximate deadlines.

5. **Vita** (no more than four single-spaced pages): A copy of the applicant's vita must be submitted with the application to support the investigator's qualifications in the proposed research area. The following information should be included in the vita:

a. education (listing degrees and dates awarded, period of any additional training)

b. professional employment (listing dates and titles)

c. pertinent publications (distinguishing between peer reviewed publications, proceedings, abstracts and other presentations) (can be selected)

d. scholarly products and/or artistic productions

e. External grant support with the following details (including pending):

(i) Funding Agency

(ii) Title of award

(iii) PI and Co-PI as listed in proposal

(iv) Total period of the award (since last competing renewal)

(v) Total amount of award (since last competing renewal)

(vi) Amount of award for current award year if a multi-year award

(vii) For multi-year awards with competing renewals, date of initial funding.

f. External grant support applied for during the last 5 years including current year (but not awarded) with the following details:

(viii) Funding Agency

(ix) Title of award

(x) PI and Co-PI as listed in proposal

(xi) Total period of the award (since last competing renewal)

(xii) Total amount of award (since last competing renewal)

Note: If the page limit is exceeded, only the first four (4) pages will be used for the review process and any additional pages will be discarded.

6. **Status Report**: A status report listing the accomplishments for each prior project that has been funded under any University Research internal grant program within the last five years is required. Incomplete data will exclude one from eligibility.

7. **Budget**: Support may be requested for graduate research assistants, student assistants, and support for course release(s) during the year and for summer salary. Support may also be requested for supplies, participant remuneration, equipment, and travel to engage in research activity. Travel expenses to attend or present at a professional meeting or conference will not be funded unless there is a special rationale and justification provided in the Budget that directly relates to the project description. A budget format form is included in these guidelines for information purposes.

8. **Budget Justification**: A justification must be included for **each** budget item.

Travel that is required to conduct research is eligible for funding. Eligible costs include travel and maintenance away from home, costs of reproducing materials, and other costs associated with gaining access to the research materials. Air and train travel must be calculated on the basis of economy rates. Estimated costs for subsistence and lodging must be reasonable, and charges to grant funds for these items must be based on University regulations. Mileage must be figured at no more than the approved University mileage rate. Justification of travel should include the following points (when appropriate):

- a) where the proposed trip fits within the overall plan and the importance of travel to the specific facility/location for completion of the project
- b) the reasons for the choice of the specific location; for example, its uniqueness, the size, or the comprehensiveness of the equipment or collection
- c) the reasons why travel to the collection is necessary instead of interlibrary loans, microfilms, or other means of utilizing the materials
- d) evidence of competence in the special areas needed if the materials are in a foreign language or require special skills to do the research.

If an applicant is requesting support for travel to a specific laboratory, library archive, or repository, a letter or other appropriate documentation from the institution where the research will take place, signed by the director, archivist, curator, or other responsible official should be provided. The documentation should indicate that the specific resource that the applicant wishes to utilize is accessible and will be made available to the applicant during the period requested in the application. A published statement indicating that the specific laboratory or collection will be accessible to researchers during the period requested may be substituted for the letter or documentation.

9. Need of the applicant. (Required only if applicant has current internal or external funding for research activities).

Listing of all internal and external funding for the applicant's research activities (including department funds) during the current and next fiscal year and an explanation for why the requested funds are needed to accomplish the proposed research goals.

10. Letters of cooperation. If the project depends on collaboration or cooperation of others, a letter of cooperation may be included. However, general letters of support from chairs or colleagues should **not** be included in the application.

11. Appendix. Include evidence, if appropriate, that the project will result in a significant product (e.g., book contract, reviews of a book proposal, priority score and reviews from a grant submission).

REVIEW PROCEDURES

The Vice President for Research and the Associate Vice President for Research awards funding to proposals based on the recommendations of the University Research Internal Grants Faculty Peer Review Committee. This interdisciplinary committee is composed of senior faculty scholars from across the University. Reviewers use the review criteria detailed below to evaluate and assign a single, global score for each application.

REVIEW AND AWARD CRITERIA

1. Probability the project will result in a significant product or outcome as judged by:
 - a) Prestige of the product
 - b) Significance of the project to the applicant's discipline
 - c) Project methodology
 - d) Innovation
2. Feasibility of time line that significant product will be completed
3. Qualifications of the applicant
4. Evidence of attempt(s) by the applicant to obtain external funds
5. Need of the applicant as judged by:
 - a) current resources of the applicant to engage in research activities
 - b) previous internal support of the faculty member
 - c) costs associated with the proposed research project

INFORMATION

Further information about the Scholarly Support Grant Program described in this announcement may be obtained by contacting:

COVER PAGE

Project Number _____
(For Office Use Only)

Title of Project: _____

Principal Investigator(s): _____

Department(s): _____ Telephone #: _____

Email address: _____

Amount Requested: \$ _____

Name of Department Business Manager _____ Phone Number _____

Are Human Subjects Involved? No ___ Yes ___ IRB# _____ or Status _____
(The Georgia State University Institutional Review Board for the Protection of Human Subjects must approve projects involving human subjects; if approval is pending, no funding will be provided until the protocol is approved)

Are Vertebrate Animals Involved? No ___ Yes ___ IACUC# _____ or Status _____
(The Georgia State University Institutional Animal Care and Use Committee must approve projects involving vertebrate animals; if approval is pending, no funding will be provided until the protocol is approved)

Are Biohazardous Agents, Recombinant DNA Molecules, and/or Biologically-Derived Toxins Involved? No ___ Yes ___ IBC# _____ or Status _____
(The Georgia State University Institutional Biosafety Committee must approve projects involving biohazardous agents, recombinant DNA molecules, and/or biologically-derived toxins; if approval is pending, no funding will be provided until the protocol is approved.)

Is Ionizing Radiation Involved? No ___ Yes ___ RSC# _____ or Status _____
(The Georgia State University Radiation Safety Committee must approve projects involving ionizing radiation; if approval is pending, no funding will be provided until the protocol is approved.)

Are Hazardous Chemicals Involved? No ___ Yes ___ or Status _____
(If yes, the Office of Research Integrity Environmental Programs must be notified before funding can be provided.)
